

Car Coming Signs

Introduction

Our Car Coming Signs are designed to warn pedestrians that a car is exiting from a parking area or blind corner by emitting an audible and visual warning.

The sign is double sided* and contains 3 LED lamps along with an audible pedestrian buzzer to ensure that everyone near the area is aware that a car is approaching.

Constructed to withstand NZ weather conditions, our Car Coming Signs are manufactured from a powdercoated, aluminum housing which is weatherproof and rust resistant.

*Single sided unit can be made upon request.

Features

- **Highly audible buzzer**
- **High visibility**
- **Compact & lightweight**
- **Visible from two directions**
- **Easy Installation**
- **Illuminated on activation**
- **Wall or Pole Mounted**
- **Mains powered (230V)**
- **Powder coated aluminium casing**
- **Highly compatible (Multiple trigger options)**

Stockcode: CR CCSCOM

Wiring & Installation

Our Car Coming sign can be used in conjunction with a wide range of parking systems or access control systems including roller doors, barrier arms, IR beams and vehicle loops /loop detectors. The Car Coming sign is wired into the "open" contact of one of the above triggers so when a vehicle is exiting, the car coming sign is activated.

The sign can be installed by a registered electrician and either be wall mounted or installed on a 76mm Aluminium Fluted Pole.
