

# HTL STATIC WARNING SIGN WIG WAG

Stay proactive against potential accidents with our state-of-the-art Static Warning Sign Wig Wags, designed to alert drivers to upcoming changes and warnings on the road. These highly visible, flashing signals are perfect for construction zones, cattle crossings, school zones, and any location where effective traffic management is essential.

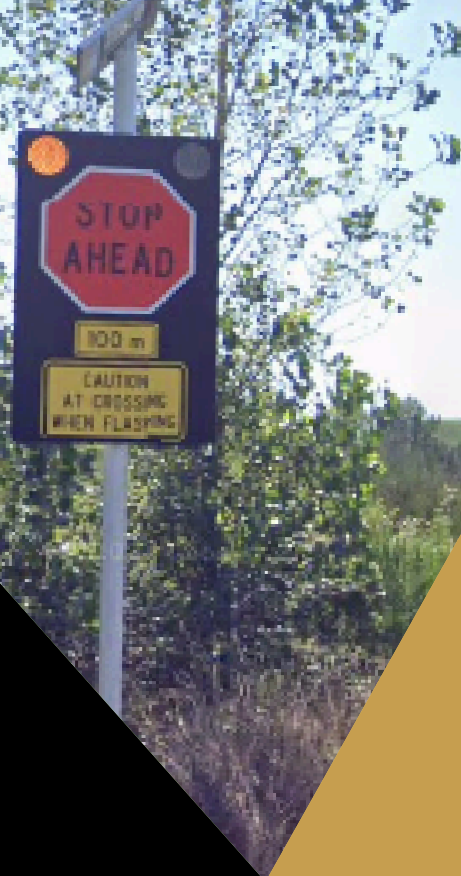

Featuring bright LED lights and a sturdy, weather-resistant design, our wig-wag signs guarantee dependable performance in all conditions. They are easy to install and offer clear, immediate warnings, helping to minimize accidents and maintain smooth traffic flow.

Unlock ultimate flexibility with our fully customizable activation solutions. Whether through remote control, push buttons, sensors, or radar technology

Select the ideal warning light for your safety needs from our options. Choose compact 100mm lights with a 1100mm H sign or 200mm lights with a 1500mm H sign for enhanced visibility and impact.

Power your warning lights with flexible options to suit your needs. Choose from eco-friendly 60W or 100W solar power for sustainable energy solutions, or go with a reliable mains-powered option
